

# PRODUCT ADVISORY NOTICE

---

KEEPING YOU INFORMED OF PRODUCT CHANGES

---

**To:** All Customers, Sales Representatives and Distributors

**Date:** February 14, 2006

**Subject:** Grayhill Series 30: RoHS Compliance Information

In order to comply with the Restriction on Hazardous Substances directive, Grayhill, Inc. is removing cadmium from our Series 30 switches. Most components had a bushing or hex nut plated in cadmium. This has been replaced with a zinc trivalent chromate finish. The new products will be free of any restricted substances and will be compatible with existing tin/lead processes as well as lead-free processes.

The part numbers will not change. Grayhill, Inc. will be making a running change. As inventories of non-compliant parts are depleted, they will no longer be available and compliant parts will become standard. All switches manufactured after April 1, 2006, with EIA date code 0614 will be compliant. Shipping boxes and packing slips will be labeled or marked with a lead-free compliance marking per JESD97 and an "RoHS Compliant" tag.

If you are currently purchasing a custom part number containing "YY" please contact your Grayhill, Inc. sales representative to determine your changeover plan.

A roadmap providing further information can be found at: <http://www.grayhill.com/Lead-Free.htm>

Please contact your Grayhill, Inc. sales associate with any questions you may have.
