

SAMTEC WORLD DIRECT

For nearly a decade Samtec, the service leader in the interconnect industry, and Sager Electronics have partnered to offer an innovative approach to delivering Samtec products with faster lead-times, accurate real-time delivery information – and without increased cost.

SUDDEN LINK + SUDDEN SERVICE® = STREAMLINED ORDER & DELIVERY PROCESS

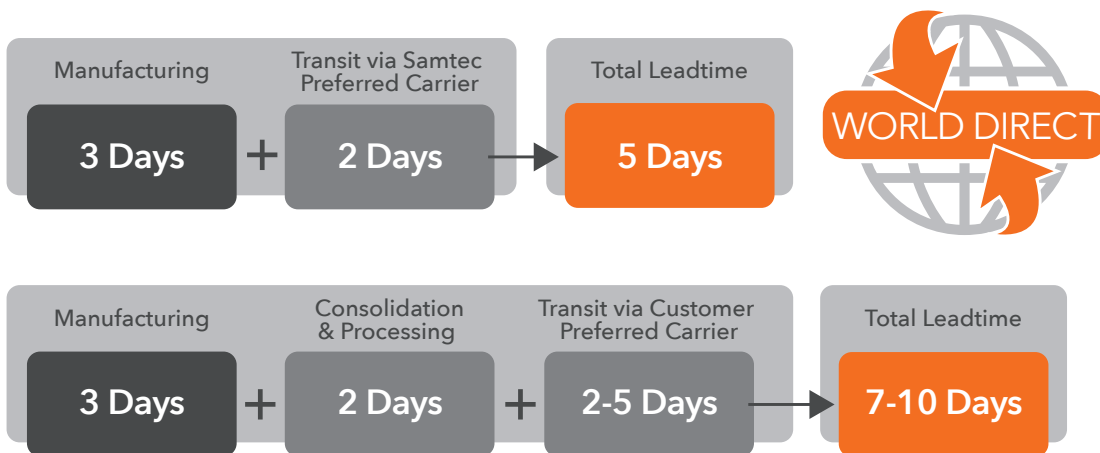

Sager's Sudden Link Program teams Sager logistics capabilities with Samtec Sudden Service®. Using state-of-the-art technology, Sager's sales team is able to work with real-time data directly in the Samtec system to ensure accurate lead-time and delivery information to help streamline your planning process.

Once an order is placed, the product is automatically shipped from a Sager stocking location or directly from Samtec – eliminating unnecessary transit times and getting product to you faster.

WORLD DIRECT = INDUSTRY-LEADING LEAD-TIMES

In addition, Sager Electronics now offers Samtec's "World Direct," an innovative shipping program that bridges the gap between manufacturing and customer by bypassing processing at local facilities and shipping the product directly to you, resulting in **lead-times that are often reduced by nearly 50%**.

To learn more about how Sager can help deliver Samtec interconnect solutions to you faster, please visit sager.com, or contact customerservice@sager.com or 1-800-SAGER-800.
